

Paintless Dent Repair & Removal

You're hard at work, concentrating on an upcoming deadline and barely noticing the storm gathering outside. Until you hear hail pelting the window, that is. Meanwhile, outside in the parking lot, your car is getting pelted too. If you're like many people, you worry that the hail damage is either beyond repair, or that you'll need an expensive paint job afterwards.

Reviews

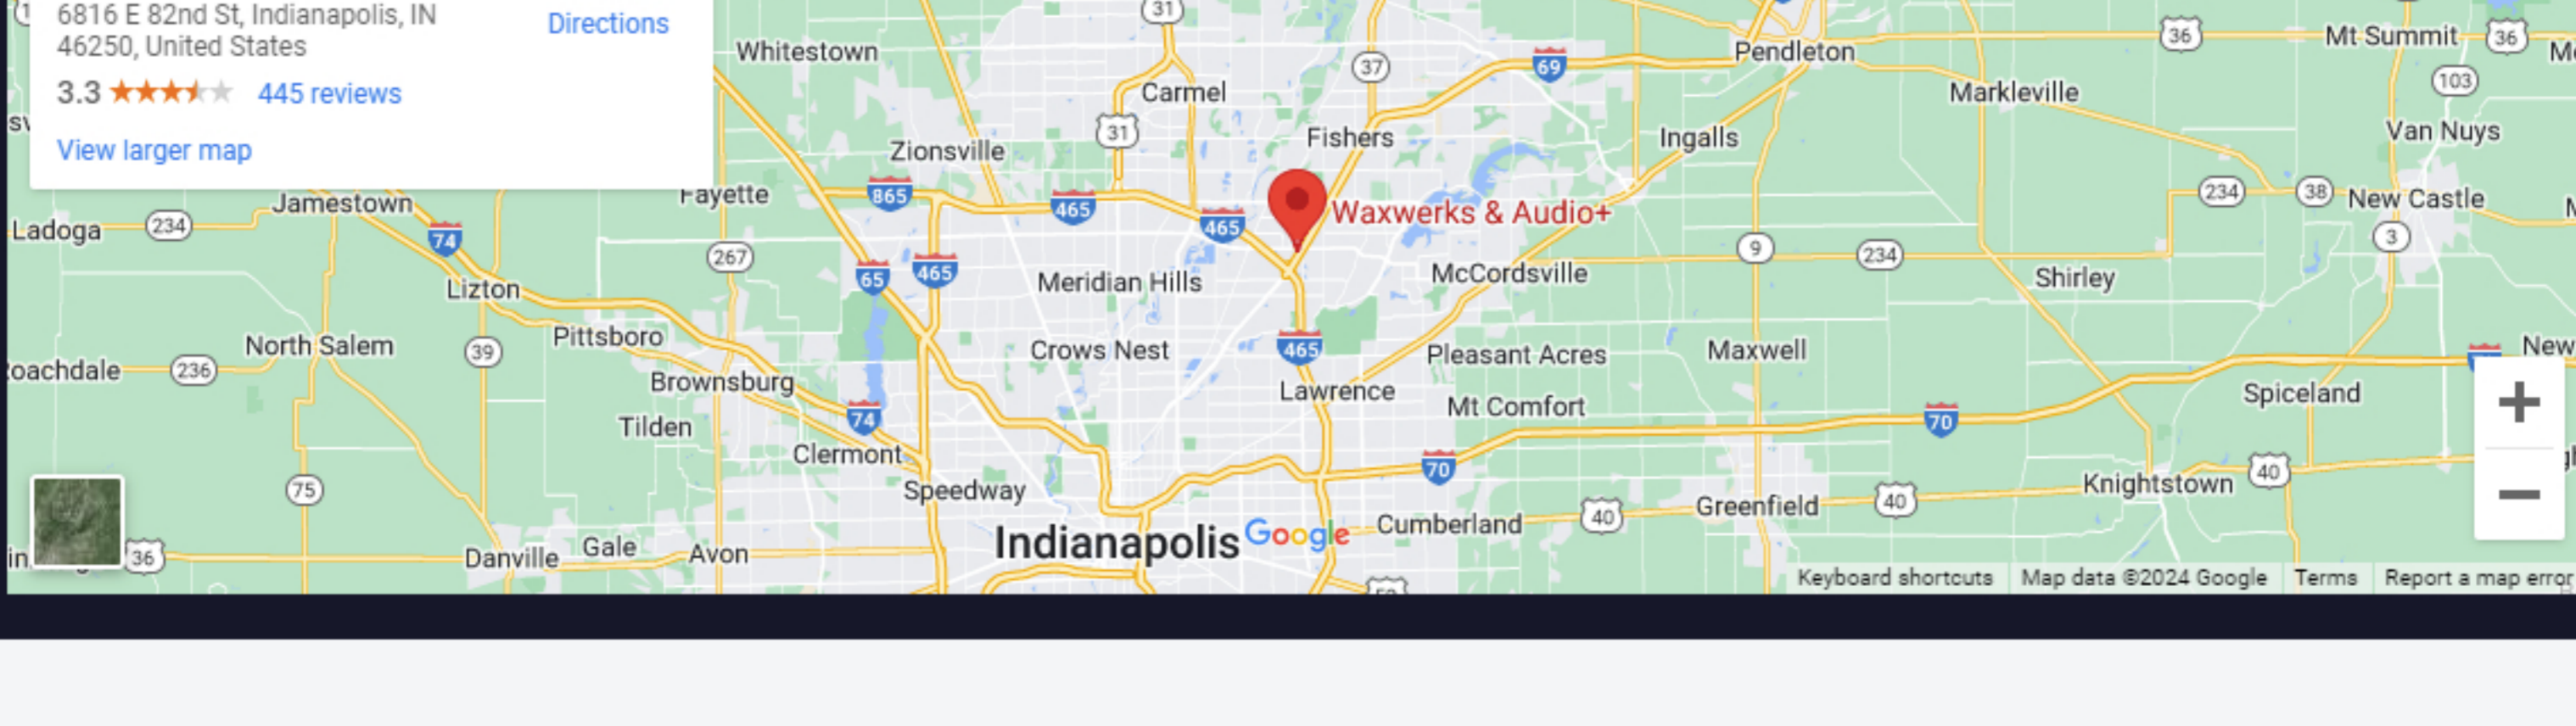

Ray and the rest of the crew there are so nice. I have had two car's windows tinted by them and both times have done an excellent job. The shop is clean. One of the cars I have done about 4 years ago and the tint still looks amazing. Their prices are very competitive and worth every penny. My car had factory tint on the back windows when I arrived and they matched it to the 15% I wanted on the front. It matches perfectly as you can see in the picture. When I get another car in a few years I will be going back to them again. I recommend them to everyone I know.

Noah Pollard

Our Locations

WAXWERKS

When repair is attempted by an untrained or improperly trained automotive technician, it can actually cause further damage to your car. At Waxwerks & Audio+, our experienced team has been specially trained to service all types of vehicles, makes and models.
